Understanding Capricorn

Happy Birthday, reliable leader Capricorn!

As a practical earth sign ruled by the disciplinarian and planet of rules and regulations Saturn, you are the natural CEO of the Zodiac. Your focus generally is on: a powerful desire to succeed, your standing in society, fairness, wanting to treat everybody with respect, your willingness to learn the ropes and come up from the ranks.

Represented by the sea goat or mountain goat, you assiduously advance to the helm of whatever endeavor you set your sights on and build your foundation from the ground up. In recent years the transiting planets in Capricorn have reshaped your goat's psyche and helped you overcome old school notions that have outlived their usefulness. Naturally conservative and reserved, Caps can actually be kind hearted and charismatic even becoming warm and cuddly teddy bears, once people around them prove to be trustworthy. Also you can be extremely mature in youth and seem to become more youthful with age.

In the professional realm you are noted for your fatherly compassion and you'll find more Capricorn bosses than probably any other sign. They tend to provide employees who prove their worth and ability tremendous latitude to do their jobs with freedom and mutual regard. While they may not easily express emotion or give flattery a word of appreciation from a Capricorn boss will mean a great deal.

Caps in 2015

The evolutionary sign of Pluto has been in your sign for the past few years and will stay there through 2023. It has been forming a square to Uranus the planet of revolutionary change with a break out opportunity to completely recreate your path and sense of identity. Your inherent infrastructure is being torn down and rebuilt from the ground up. Saturn and Neptune are in harmonious aspect to your Sun indicating great creativity, hard work, spirituality and vision are keystones in the coming year.

Some well known Capricorns include such high achievers as news caster Katie Couric; President Woodrow Wilson; founding father/scientist Ben Franklin; ground-breaking physicist Isaac Newton and Jeff Bazos, the founder of Amazon.com.

*If you are a Capricorn and do not resonate to these attributes you'll need to look at the rest of your chart as this description only relates to your sun sign and ascendant.
